Pharmacy Monitoring

NDC 66521-119-10
INFLUENZA VIRUS
VACCINE Fluvirin®
2012-2013 formula
5mL vial

A close-up photograph of a pharmacist in a white lab coat holding a tablet computer. The pharmacist is smiling and looking at the screen. The background shows shelves stocked with various medications in a pharmacy. The entire image has a warm, orange-toned overlay.

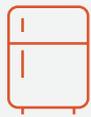

Digital pharmacy
safety is here.

Proactive Pharmacy Safety

Pharmacy safety and quality control programs are critical to protecting your patients and meeting federal regulations. These programs are aimed at improving quality standards and control, reducing losses from spoilage, and avoiding safety incidents. But most rely on manual monitoring, which at best gives you point-in-time snapshots, leaving you feeling in the dark and unable to properly manage your pharmacy's safety risk.

SmartSense's wireless sensors enable you to gain real-time insights into all your locations. With our remote monitoring system, you gain actionable insights and automated checklists, quality control, and risk management.

Gain Visibility & Actionable Insights

Management

Sensor data is sent to our cloud-based dashboard. Here, you gain operational transparency and prioritize your response in real-time.

Make Smarter Decisions

SmartSense puts you in control of your operations and lets you make faster, more knowledgeable decisions about your pharmacy. This means better experiences for your customers and patients, as well as improved regulatory compliance for your pharmacy.

A man with a beard, wearing a white lab coat and a purple tie, is holding a silver tablet. He is looking at the screen. The background is a blurred laboratory or office setting with various equipment and charts. The overall lighting is warm and orange-toned.

Visibility enables
informed decisions.

The SmartSense System

The SmartSense system is designed to solve your most important pharmacy safety challenges. The system combines wireless sensors with remote monitoring software and a digital checklist. The results are actionable insights that drive quality control, employee productivity, and regulatory compliance.

Wireless Sensors

Connect any fridge or freezer in minutes with SmartSense's wire-free sensors.

Monitoring Platform

Gain proactive insights and remotely monitor equipment to maintain visibility automate paper logging.

Compliance Reporting

Maintain regulatory compliance with on-demand and scheduled reporting.

The SmartSense Difference

Proactive Insights

Gain visibility with predictive models and simulated product temperature that enable proactive decision making.

Collaborative Monitoring

Drive efficiency with SmartSense's collaborative system for incident management and cross-team workflows.

Deploys in Minutes

Install in minutes with wire-free sensors. Quickly monitor temperature, humidity, tank, energy, and other sensors.

Enterprise Grade

Store & forward technology for lossless monitoring, up to 3-year battery life, IP-67 rated sensors, and AES encryption and certificates.

Compliance Visibility & Efficiency

Meet rigorous CDC, Board of Pharmacy, and VFC compliance standards. Gain visibility into site performance for improved accountability.

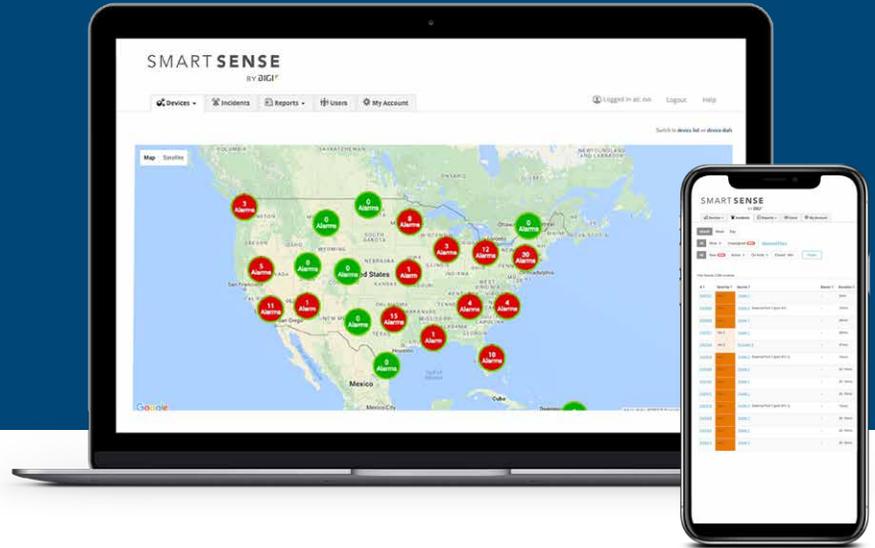

Deployment Experience

We partner with our customers to create world leading systems. We have experience deploying 250 sites per day.

SmartSense Dashboard

SmartSense’s cloud-based dashboard provides real-time oversight of your food safety initiatives and visibility into compliance, site performance, and risks.

Proactive Insights

Make proactive decisions using SmartSense’s patented product simulation that provides insight into actual product temperature as well as ambient temperature.

Team-Based Monitoring

Assign incidents to teammates and track corrective action from anywhere with SmartSense’s collaborative approach to incident and workflow management.

Automate Reports

Receive automated reports by email to replace paper temperature logs and to identify chronically failing fridges and identify sites that have the greatest safety risk.

Visibility & Accountability

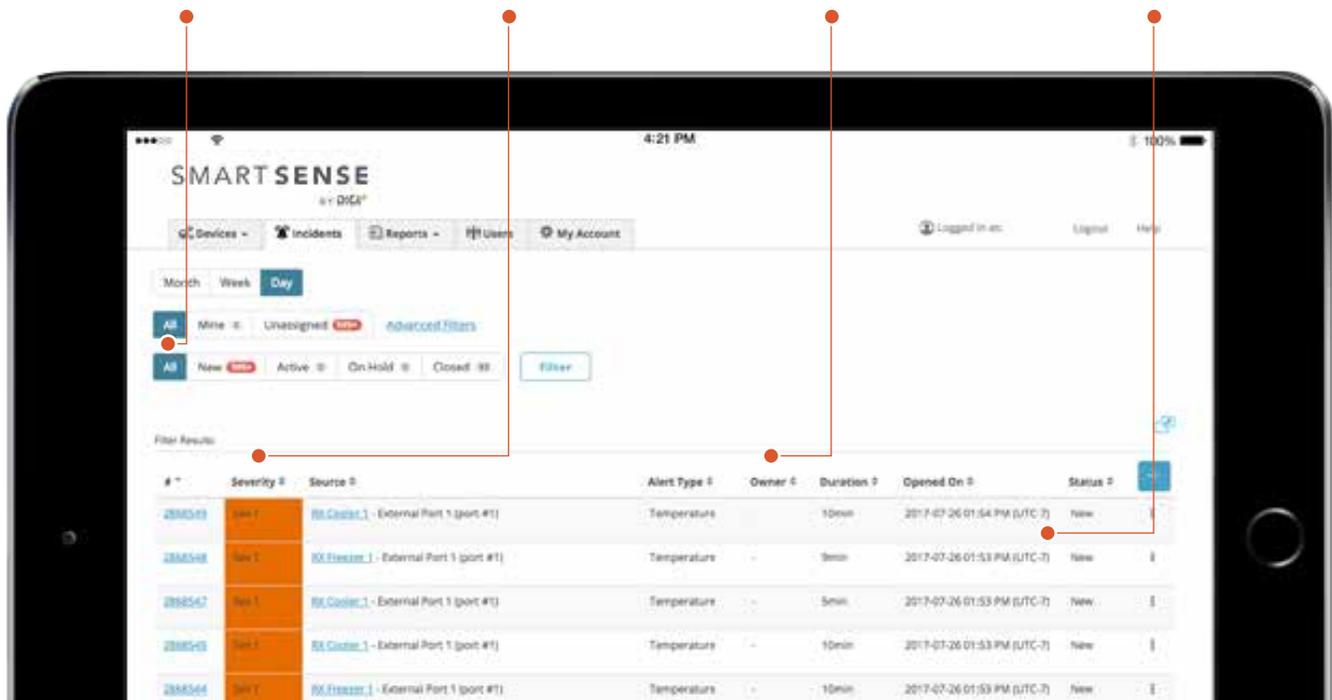

Gain visibility into your compliance checks and easily measure and compare site performance. Increase accountability with timestamps and signatures.

Manage Workflow

Prioritize By Severity

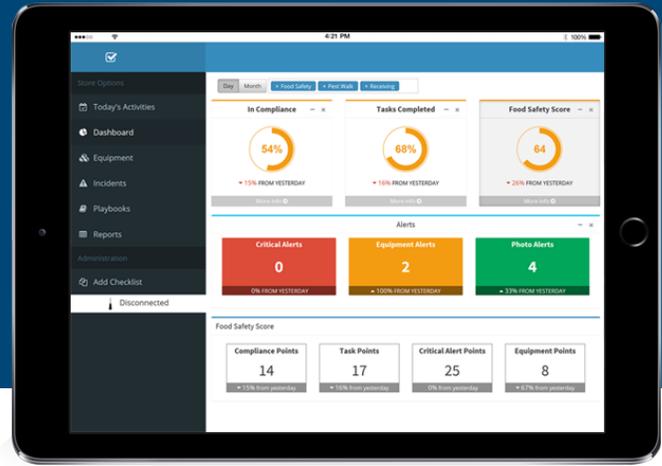

Assign Ownership

Actionable Context

Digital Checklist

SmartSense's digital checklist replaces paper checklists with an intuitive task management system that provides visibility across all your sites.

Visibility & Insights

Gain real-time insights into checklist compliance and easily compare site performance. Quickly identify at-risk sites for immediate remediation.

Task Management

Remotely publish and manage checklists for pharmacy safety, quality control, receiving, promotions, and more. Easily customize checklists and instantly push to all your sites.

Integrate Equipment Monitoring

Automate equipment monitoring with seamless integration of SmartSense's wireless sensors with the digital checklist.

Automate Reports

Schedule automatic or on-demand reports to replace paper logs and checklists. 10-year historical data log eliminates the need for extensive paper records.

Wireless Sensors & Screens

SmartSense's wireless sensors offer the world's only 100% wire-free installation and wireless screens for deployment in minutes.

Actionable Alerts

Receive both audible and visual notification when sensors are in alarm.

High Contrast Display

High contrast e-ink display provides crystal clear readings.

Plug & Play Install

Sensors automatically connect to your SmartSense gateway to provide a self-provisioning installation process. Centralized configuration is provided through our web-based dashboard.

100% Wire-Free

Deploy in minutes with the industry's only sensor that can be placed directly in fridges and freezers - no wires or cords.

About SmartSense

SmartSense transforms how organizations sense, monitor, and make decisions. Using the Internet of Things (IoT), SmartSense changes the way organizations approach compliance, quality, and efficiency.

SmartSense automates monitoring for food safety, pharmacy safety, product quality, and preventative equipment maintenance. Today, SmartSense has earned the trust of the most critical government, commercial, and non-profit institutions in the world. Our systems enable real-time sensor-driven decisions at over 2,000 organizations in 75 countries.
